

**Your Fleet.
Your Shop.
Our Expertise.**

Improve business operations with **OnSite Fleet Maintenance**.

OnSite Fleet Maintenance

Your focus needs to be on your business, your product, and making sure your customers get what they need when they need it. Your business depends on your trucks, but managing a fleet takes time and energy away from your business. That's why we offer OnSite Fleet Maintenance, an elite service program for select customers that can most benefit from dealer fleet management.

Our team of experts can step in to manage your existing shop, including your employees, to improve efficiencies, optimize costs and bring the power of an OEM dealer right to you.

We understand this is a multi-level decision, that's why we want to include your service and operations leaders, procurement experts, finance leaders and c-level executives in the process to determine the best solution for your needs.

OnSite Fleet Maintenance

Why Bergey's?

We strive to provide you with a full-service solution that includes benefits only a certified OEM Dealership can bring.

- » Predictable costs with increased shop and fleet efficiency
- » Measurable uptime metrics from fleet telematics
- » Managed warranty work
- » OEM training for your technicians with up-to-date diagnostic tools and technologies
- » Work prioritization control
- » Access to the Bergey's Truck Parts network
- » Availability of commercial tire sales and services
- » Support with challenging tech and driver retention and recruitment
- » Access to rental units to facilitate growth opportunities

Keep your fleet on the road and your business running smoothly with the help of OnSite Fleet Maintenance with Bergey's Truck Centers.
